

Shreya Bhattacharya

Product and Data, Zomato | B.Tech, Indian Institute of Technology Kanpur

+91-7991142880 | pvt.shreyabhattacharya@gmail.com | linkedin | website

ACADEMIC QUALIFICATIONS

Year	Qualification	Institute	CPI/%
2020 - 2024	B.Tech	Indian Institute of Technology Kanpur	8.0/10.0
2020	Class XII (CBSE)	Delhi Public School, Bokaro Steel City	96.0%
2018	Class X (CBSE)	Delhi Public School, Bokaro Steel City	96.2%

WORK EXPERIENCE

Product Analyst | Zomato

(Jun '24 - Present)

Consumer Product :

- Led **VIP Mode** by identifying painful cohorts, building logic, driving execution across experimentation and performance tracking.
- Optimised **Near and Fast** by reworking ETA algorithms, analysing breach patterns to define “**painful**” breaches, and running targeted experiments to reduce them. Revamped both UI logic and ranking algorithms, driving a **+1%** relative uplift in OTR.
- Built a recommendation model for **Top Dish Rail** on homepage, improving discovery, exploration, and new-to-restaurant order share.
- Led revamps across **homepage, catalogue, cart and live order** assets, including **autosuggestion, offers, restaurant cards, catalog snackbar, cart add-on recommendations, live activity, tips and rating**; via **A/B testing** and conversion rate optimization.
- Managed Zomato Gold; drove growth experiments, sales and cohort analysis, retention analysis, and optimized subscription funnel.

Social Ads :

- Designed **audience cohorts** using behavioral signals and performance feedback to improve targeting precision and campaign effectiveness.
- Owned entire data workflows for **off-platform ads**, including data pipelines and reporting dashboards for monitoring campaign performance.

Zomato Everyday :

- Improved **Kitchen Preparation Time model** by building a Gradient Boosting Regressor Model using dynamic restaurant clustering and time-based feature engineering, reducing MSE from 4.1 to 0.7, lowering 2-minute SLA breaches by 8%.
- Built and owned a **CRM notification pipeline**, enabling real-time and personalized user communications across key lifecycle touchpoints.

Data Analytics and Strategy Intern (CEO's Office) | Kapiva

(May '23 - Jul '23)

Received the ‘**Kapiva Innovation award**’ for excellent performance’ in the Q2-2023

- Analyzed data across multiple channels to identify churn patterns and key customer experience bottlenecks.
- Drove organizational restructuring by benchmarking operations and identifying gaps through competitive analysis, resulting in the launch of a Tech-Product vertical to streamline operations and maximize efficiency.

Research and Development Intern | Eigenlytics Data Solutions

(May '22 - Jul '22)

- Built NLP models based on Named Entity Recognition using spaCy for information extraction from unstructured legal text.
- Improved the accuracy of a pre-existing model from 35% to 80% by analysing legal documents and optimising for training.

TECHNICAL SKILLS AND RELEVANT COURSES

Languages	Python, R, SQL (MySQL, Druid, Flink)
Data Engineering	PySpark, Apache Kafka, Apache Superset, Airflow
Utilities	Ms-Office Suite, Google Analytics, Power BI, Tableau, Figma, Git/Github, Asana, Confluence
Competencies	A/B Testing, Statistical Modelling, Probability and Statistics, Product Strategy, Conversion Rate Optimization, Dashboarding and Performance Monitoring, Exploratory Data Analysis, Root Cause Analysis

PROJECTS

Automatic Music Transcription | Science & Technology Council

(May '21 - Jul '21)

- Applied computational methods to infer parameters from audio, using spectrogram-based transformation to MIDI files
- Employed Keras with TensorFlow backend for training DNN, CNN and RNN models where CNN had the best results
- Achieved F-score: CNN, predicted = 72.55, post-processed = 72.91; for RNN, predicted = 67.64, post-processed = 67.78.

ML based Fractography | Prof. Sandeep Sangal, IITK

(May '22 - Jul '22)

- Conceptualised a supervised Support Vector Model to classify metal fracture SEM images into a brittle or ductile fracture
- Evaluated methods like gray-level histograms, gray-level difference, GLCM & fourier power spectra for texture analysis
- Visualised fractals as a parameter and implemented box method & differential box method to determine its dimensions

EXTRA CURRICULAR

- Head, Media and Publicity (Techkriti'23, IITK) :** Led a 120+ member team to drive publicity and media partnerships, managing coverage across events, competitions, and talks for Asia's largest technical and entrepreneurial festival, with a budget of INR 2 Cr.
- Coordinator (Fine Arts Club Media, IITK) :** Managed operations, media, events, workshops and finances to promote art on campus.
- Project Mentor (Stamatics, IITK) :** Mentored 100+ students to learn probability theory, statistics, modeling and visualization techniques.
